Colon Hydrotherapy

An ancient therapy with the most innovator technology

HC-2000 - Automatic

Is a union of **MODERN, CLEAN, and STURDY** technique with complete **EASE OF HANDLING, ABSOLUTE CONTROL** of all **CONSTANTS TOTAL EFFICACY TOTAL HYGIENE** of the **LARGE INTESTINE** and **UNPRECEDENT SAFETY** form the basis of: **COLON HYDROTHERAPY**

Technical characteristics:

Easy Installation

Remote control and front panel (independent operating)

Low consumption

Automatic pressure safety at 100mbar

Automatic temperature safety at 22°C and 40°C

Digital Thermostat

Regulatable pressure gauge from 0 to 200mbar

High sensitivity fuses against circuit overload

Hermetic, odour-free drainage system

Automatic Disinfection

5 microns activated carbon filters

Device for introduction of therapeutic solutions:

salt water, oxygen, ozone

UV lamp: total elimination of bacteria and viruses

lifetime up to 9000 hours

Special materials that prevent water contamination

Session timer

Irrigation liter counter

Irrigation time counter

Emergency shutdown system

A system of collection of samples for analysis

One use hydrokits

1 speculum

1 obturator

1 inflow hose

1 waste helicoidal hose

lubricant

Available in sizes
large & small

Do you know the benefits of Ozone Therapy?

Ozono is capable of:

attacking and destroying any type of micro-organism such as bacteria, viruses, algae...

breaking down organic substances such as detergents, pesticides,...

neutralising inorganic substances such as ammonia, urea...

Colon Hydrotherapy

An ancient therapy with the most innovator technology

HC-3000 - Electronic

**THE FIRST MACHINE TO INCLUDE
ELECTRONIC AND DIGITAL TECHNOLOGY
IN COLON HYDROTHERAPY**

Technical Characteristics:

Digital display with messages that relate the events
that may occur during the length of the session

Minimum installation required

**Automatic System for water ozonization,
built in the machine**

Automatic for session preparation

Automatic disinfecting system

Automatic digital temperature safety system 20°C and 40°C

Automatic pressure gauge from 0 to 200mbar

Automatic pressure safety at 100mbar

Comfortable and accessible system for gathering samples

Total shutdown system

Liter session counter

Irrigation time clock

Device for oxygen access

Active carbon filter of 5 microns

Innovative desing

Transportable

Operating control of the unit using two different systems:

- Remote control device

- An easily accesible front panel

Hermetic, odour-free drainage system

Special materials that prevent water contamination

One use hydrokits

1 speculum
1 obturator

1 inflow hose
1 waste helicodial hose
lubricant

Available in sizes
large & small
